第四篇

Hello, my professors. It's a fine day today, and I'm very pleased to meet you here. First of all, I'd like to introduce myself to you. My name is ***, my hometown is ***, which is a really beautiful city. Even when I was a young boy, I was very interested in biology science. Every one may have a dream, and I still remember that my dream is to be a biology scientist (just like ZHU KE ZHEN). I liked to make wonders just like, where are we from? Where are we going in the universe? And then I would find the answers in book by myself. Still today I think that interest is the best teacher in one's whole life (and knowledge comes from practice).

Second, I will introduce my major in the university. My major is Biological Engineering in *** University. It has a great relationship with biology science. Their relationship can be shown with an example: Just like a river, biology science, which often finds new discoveries and theories, is at the head of the river. And my major, which lays more stress on practical use, seems to be at the end of it. When both of them interact well enough, the discoveries and theories in biology science can be soon turned into products in all of the modern industry.

Four years' university education gives me a lot of things to learn, a lot of chances to try, and a lot of practices to improve myself. It teaches me not only what to study and how to think, but also to see the importance of practical ability (such as doing experiment as much as possible). In the university life, I have made many good friends. They help me improve my study and research ability, do everything just like a man, and often give me good example to follow.

Besides what I have introduced myself above, I also have many interests in my spare time. I like playing football, which is an effective way I think to improve my body health, and it can teach me how to join in a group and deal with other people. Drawing and writing is another favor to me.

Above all, I choose the major in order to broad my view in biology science, and enhance my research ability. I will do my best to join the new group and be good at postgraduate study.

Their 有很大的关系的关系可以用一个例子所示: 就像一条河流, 生物科学, 这往往寻找新的发现和理论, 似乎是在结束他们两个 it. When 互动不够好是我的专业在 river. And 头部的, 它注重实际使用更多的压力, 中, discoveries 在生物科学和理论可以很快变成产品在所有的现代工业。四年的大学教育给了我很多东西要学习, 有很多机会去尝试, 以及很多的做法, 以改善 myself. It 不仅教我学什么以及如何去思考, 但也看到的重要性实际能力(例如做尽可能多的 experiment)。在大学生活中, 我交了很多好朋友帮助我提高我的学习和研究能力, 做一个人 ererything 一样, 经常给我很好的榜样。除了我上面有介绍我自己, 我也有我喜欢踢足球, 这是一种有效的方法我认为要改善我的身体健康备用许多再寄一次利益,
